

# Thinking Maps: The Bridge Map

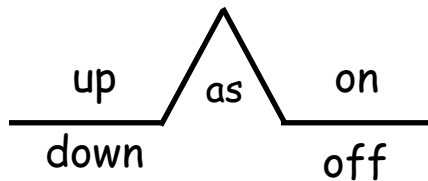

Purpose of Map:

To find relationships between things; to see analogies.

Thinking process:

This map helps to show the relationships between things such as ideas or areas. When using this map you must identify the relating factor between what is being shared. In each pair, the item at the top relates to the bottom item in the same way.

Relating factor:  
Is the opposite  
of.

Example of a Bridge Map from the classroom.
