

## About the Program

The award-winning Nessy Fingers has been a best seller for ten years. Now there is a new and improved online version. Join Team Nessy and race across 5 new islands. There are 15 new games to play. Students win trophies and earn nuggets which they trade for rewards. As they learn to type, Nessy Fingers will improve reading and spelling!

*“ It really is very simple and great fun. My 7-year-old dyspraxic son doesn't even realise we are teaching him to type...it's a treat that he gets if he has been good. ”*

**Matthew**

*“ My daughter, who is 11, has been learning touch typing now for the past 4 years and is finding it difficult due to dyslexia. She played Nessy typing last night and feels that she has learned more in the hour than she has in 4 years. ”*

**Lorraine**

TOUCH TYPING

# About Nessy Fingers Touch Typing

## Who will benefit?

Designed for students aged 7-12. It is particularly effective for students who learn differently.

## How does it work?

The secret to touch typing is lots of practice and Nessy Fingers is the most motivating typing program in the world - that's why it is so successful.

*“ My 11 year old son who is dysgraphic has been using the Nessy typing program and it has been great, he is actually learning to type. The best thing about the program is that it teaches the keys in alphabetical order so it is much easier for children to remember where the keys are. ”*

Deb

*“ This is the best typing program I have seen and feel it really encourages the children to want to succeed. ”*

Hazel

## Why is it good for dyslexia?

Children with a spatial difficulty are slower at finding keys. They often find it frustrating to use typing programs because the starting level is too high for them. Nessy Fingers is different, it has a low starting level of 4 words per minute, ensuring success.

Students with dyslexia respond better to a logical learning structure. Nessy Fingers introduces the keys alphabetically. This is a familiar sequence that makes more sense to a dyslexic than the random keys used in other programs.

## Features

- Keys are taught alphabetically
- Uses real words to improve spelling
- Add your own word lists to learn homework spellings
- Highly motivating games and trophies
- Colour-coded keys match fingers
- Best seller for 10 years
- Award-winning
- Used by 1000s of students every day
- Over 3000 words and sentences
- Helps reading, spelling and touch typing at the same time
- Students work at their own pace

## Reporting

It is simple and quick to get a new student started. Progress is easily accessed as a class or individual report. Tables and graphs show characters per minute (CPM), words per minute (WPM) and accuracy (ACC%).
