

Colour Mixing

Have a go at mixing colours. You can use paint, colouring pencils or pastels if you have them. Start with the three primary colours. Can you find out what they are? What will happen when you mix two of them together? Experiment to see what new colours you can create.

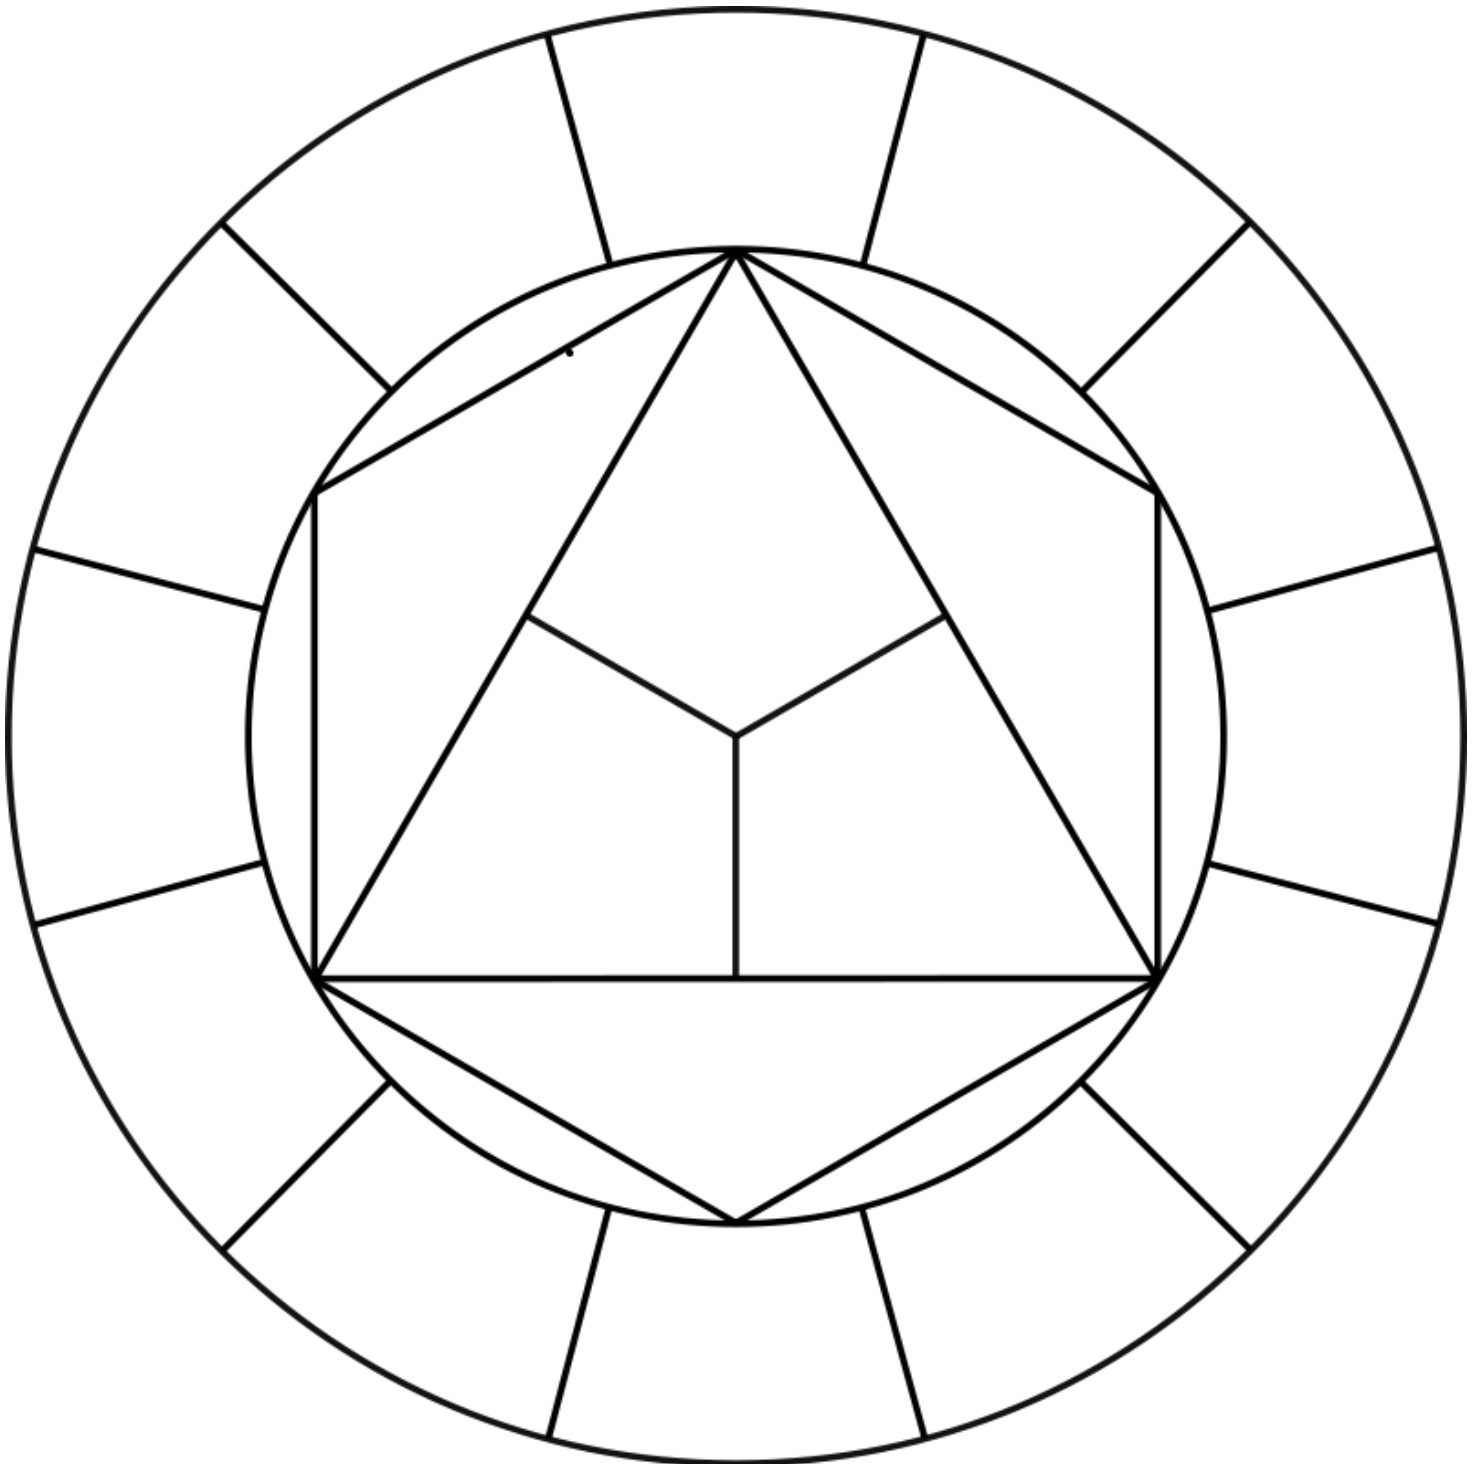

You can use the colour wheel to guide you and there is an extended version to challenge yourself with.

Primary colour

Extended colour wheel.

Do the colours you make change depending on how much of each primary colour you add?
