

Today you are going to use the same site as yesterday and will be extending the skills we built during the course of yesterday's lesson.

In today's lesson you will be learning how we can use the idea of Equivalent Fractions to simplify or reduce fractions to their smallest possible term.

Let's Do Math

Fractions

Essential Skills

Equivalent Fractions

Kahoot!

Answers A

Worksheet B

Answers B

Worksheet C

Answers C

Reducing Fractions

Kahoot!

Worksheet A

Answers A

Worksheet B

Answers B

Solve Equivalent Fraction Pair (1)

<https://www.letsdomath.ca/fractions-essential-skills>

Below the equivalent fractions links from yesterday there is a link for another instructional video on 'Reducing Fractions' - then there are two worksheets to work through.

If you finish all of the work here there is a Challenge worksheet with loads of examples to work through.
