

For Wednesday and Thursday you are going to be working from a pair of pre-recorded video lessons and some accompanying worksheets.

During the video Lessons you will need to pause the video frequently to complete tasks, when you then push play it should give you the answers and an explanation. If you miss anything or need to hear it again, you can take the video back and listen again.

The two lessons are about improper fractions and mixed numbers.

If you look back to Monday's lesson our key vocabulary included 5 key areas—these are the only two we are yet to cover.

Here are your video links for the lessons, the accompanying worksheets are on the Year 6 Maths page.

Wednesday— <https://vimeo.com/467394996>

Thursday— <https://vimeo.com/468942374>

---

On Friday we will bring together all of the learning from Monday to Thursday

Use this video link to watch another pre recorded video clip, this will talk about finding equivalent fractions, looking at mixed and improper fractions and comparing different fractions.

Friday— <https://vimeo.com/468944608>

Once you have looked at the video clip and paused it where it asks you to completing the work on worksheet 1 as you go, there is an **extension challenge** for if this has taken you less than the full hour.
