

Year 1 Maths Thursday 23rd April 2020

Ladybird Length!

LO: To be able to measure objects using a ruler.

Today we would like you to learn how to measure using a ruler!

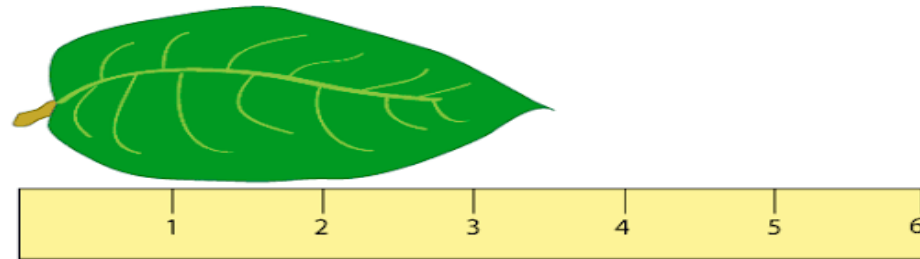

Do you have a ruler at home? If not click [here](#) to see one.

Look carefully at the ruler with your grown up, what do you notice? What do all the numbers and lines mean?

Can you see the letters CM, what do they mean? Are there any other letters on your ruler?

Once you have talked about the ruler with your grown up we would like you to have a go at measuring those objects you have been using all week! Think carefully, which way round do you need the ruler? Where must you always start measuring from? What letters do you need to write at the end of your measurement?

Record your measurements in your maths book.

Red Hot Challenge!

Ask your grown up to draw some straight lines in your book, can you measure them correctly with your ruler?
