

# Year 2 Maths Challenge!

## Birthday Pets!!

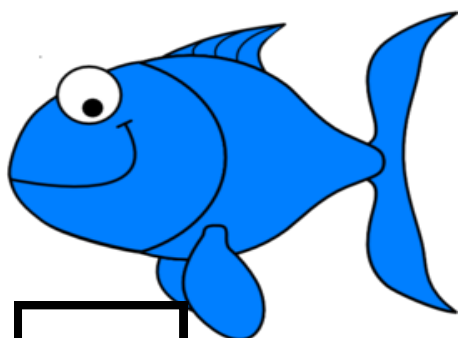

Today is all of these pets birthday! But can you work out the ages of each pet? The first one has been done for you!

years old

years old

years old

**Clues:**

**The dogs age is double the cats age + 5.**

**The fishes age is the dogs age -15 and then half of that number!**

Email your solution to me and I will let you know if you've solved it correctly! Good Luck! - Mrs Payne
