

## Year 2 Maths Home Learning 8.10.21

This week we have been practising our addition skills using a variety of methods.

Can you use your learning from this week to help you to complete these two challenges?

Challenge 1

Here is an incomplete bar model.  
The total is greater than 10 but less than 20

What could the missing numbers be?  
How many different combinations can you find?

$$8 - 5 = 3$$

$$8 - 3 = 5$$

$$8 = 5 - 3$$

$$3 = 8 - 5$$

Rosie says,

I think that all of these facts are correct because the numbers are related

Ron disagrees.

Who is correct? Can you prove it?

Challenge 2
