

Year 1 Maths Home Learning 28.1.22

This week we have consolidated our knowledge of number bonds to 10 and then challenged ourselves to learn our number bonds to 20.

Have a go at these problems below, using your knowledge of number bonds to help you.

Jack represents a number bond to 20 in the part whole model.

Can you spot his mistake?

Use equipment to represent each of the calculations below.

What is the same?
What is different?

$$7 + 3 = 10$$

$$17 + 3 = 20$$

$$20 = 7 + 13$$

Explain your thinking.

Rosie has used the 10 frames to calculate $6 + 7$

I partitioned the 7 into 4 and 3 so that I could make a full 10

$$\boxed{10} + \boxed{3} = \boxed{}$$

Use Rosie's method to complete:

$$\boxed{} + \boxed{3} = \boxed{}$$

$$\boxed{} + \boxed{} = \boxed{}$$

$$\boxed{} + \boxed{} = \boxed{}$$
