

Home Learning Term 6

This term you only have 6 pieces of home learning but you must complete all 6 please

Write a letter to your new class teacher - you don't know who they are going to be yet so make sure it is written with formal language. You will want to make a good first impression by making sure that your SPaG is all correct and accurate.

You could introduce yourself, explain some of your interests, discuss your favourite subjects and anything else you think is important.

Complete the maths sheet of 10 reasoning questions.

Write down 10 facts about Alexander Fleming and why he was important.

Create a model of the solar system, you could do this on paper or be as creative as you want. If your chosen model is too big to put in your book, you could take photos of you creating it and put those in your book.

If you are struggling, use the link below for some ideas, you could even try to make your model to scale.

<https://www.jpl.nasa.gov/edu/learn/project/make-a-scale-solar-system>

You have a booklet to complete all around the four operations in maths.

You can print this and work on the sheet if you would like to but you do not have to - you can just answer the questions in your home learning book.

Su Blackwell is an artist we will look at this term - she works with paper to create some amazing sculptures and works of art.

<https://www.sublackwell.co.uk>

Look at her website - using her style as inspiration; could you recycle some paper that would otherwise be thrown away to create your own artworks?
