

Design and Technology at All Soul's

At All Souls' Church of England Primary School, we follow a two-yearly cycle of learning in Design and Technology to take account of the fact that we have classes of mixed year groups. The Design and Technology curriculum has been developed using Cornerstones, which is a knowledge rich programme of study that supports the school's philosophy that all learning should facilitate the development of children's curiosity, knowledge and aspirations. We follow a series of Cornerstone's projects that are completed over two terms. Each Key Stage will complete three projects over the course of the school year.

For the year beginning September 2022, we will follow Cycle A.

For the year beginning September 2023, we will follow Cycle B.

By spreading the scheme of learning over a two-year period, we have ensured full coverage of the Design and Technology curriculum in each Key Stage, with a clear progression of skills and knowledge.
