

# Year 1 Maths Home Learning

This week we have been using our drawings to help us find a missing part. We have then been writing subtraction number sentences to match. Have a go at the problems below. Don't forget to show your workings out like I have below!

I am going to draw 8 as that is the whole.

I know 5 is a part. Now I will cross out 5 counters.

Now I know that the missing part is 3.

$$8 - 5 = 3$$
