

Adding by making a 10.

This week we have been using our number bonds to 10 as a strategy for addition. For example:

$$8 + 6 = \underline{\quad}$$

becomes:

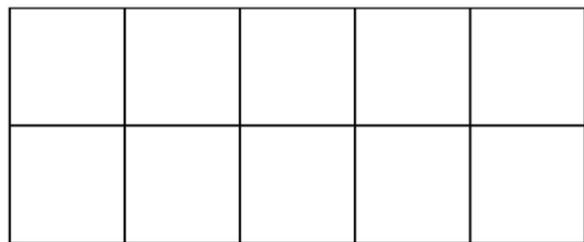

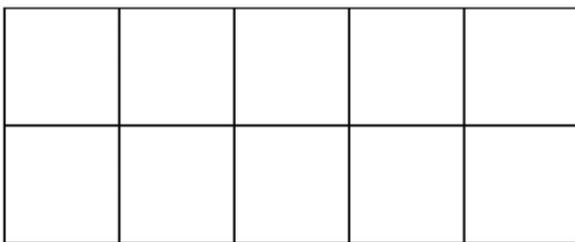

$$8 + 2 + 4 = 14$$

We made a number bond to 10 with 8 and 2. We partitioned 6 into 2 and 4.

Use this method to solve the following equations.

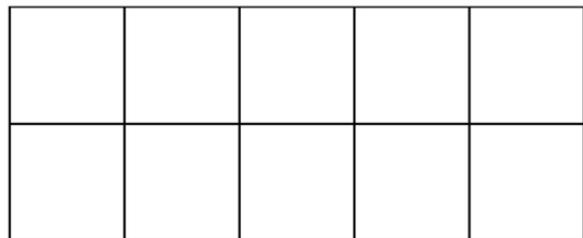

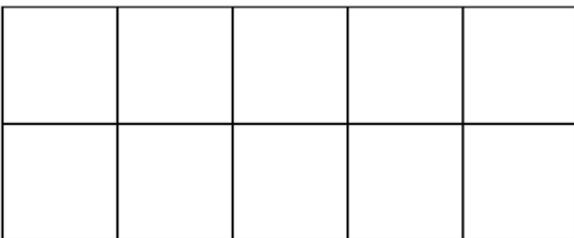

$$7 + 5 = \underline{\quad}$$

$$7 + \underline{\quad} + \underline{\quad} = \underline{\quad}$$

$$6 + 6 = \underline{\quad}$$

$$6 + \underline{\quad} + \underline{\quad} = \underline{\quad}$$

$7 + 6 = \underline{\quad}$

$7 + \underline{\quad} + \underline{\quad} = \underline{\quad}$

$8 + 5 = \underline{\quad}$

$8 + \underline{\quad} + \underline{\quad} = \underline{\quad}$

$9 + 4 = \underline{\quad}$

$9 + \underline{\quad} + \underline{\quad} = \underline{\quad}$

$9 + 7 = \underline{\quad}$

$9 + \underline{\quad} + \underline{\quad} = \underline{\quad}$

$8 + 9 = \underline{\quad}$

$8 + \underline{\quad} + \underline{\quad} = \underline{\quad}$
