

Adding by making a 10 using a number line.

We have been adding numbers using a number line and our knowledge of number bonds to 10 to help us.

Here is an example. We are adding 6 to 7 so first we will add 3 to 7 to make 10, then add 3 to 10 making 13. We partitioned 6 into 3 and 3.

$$7 + 6 =$$

$$7 + 3 + 3 = 13$$

$$7 + 6 = 13$$

Have a go at using this method to solve these calculations. Remember to label the jumps and re number line.

$$8 + 5 =$$

$$8 + \underline{\quad} + \underline{\quad} = \underline{\quad}$$

$$9 + 4 =$$

$$9 + \underline{\quad} + \underline{\quad} = \underline{\quad}$$

$$7 + 5 =$$

$$7 + \underline{\quad} + \underline{\quad} = \underline{\quad}$$

$$9 + 7 =$$

$$9 + \underline{\quad} + \underline{\quad} = \underline{\quad}$$
