

Year 2 Maths Home learning

This week we have been learning to tell the time to 5 minute intervals using an analogue clock.

Use the resource attached to practise telling the time. You will need to cut out a minute hand and an hour hand to help you. You can use the ones below or make your own out of card. If you have a split pin you can attach the hands to the clock face.

Think about all the things you do in a day. What time do these things happen?

Helpful Hints; The minute hand needs to be longer than the hour hand.

The minute hand will complete one full turn each hour and the hour hand will take 12 hours to complete one full turn.

1-12 - hours
